

The KOHLER Electric Sink

SEE THE KOHLER ELECTRIC SINK DO THE DISHES

1 *The basket is so cleverly planned that the dishes are arranged in a jiffy.*

2 *Water is supplied from the combination hot and cold swinging faucet. Two gallons is enough.*

3 *The tray for glasses and silver fits over the top of the cylinder. Then down with the cover.*

4 *Press the red button and in a couple of minutes the dishes are done.*

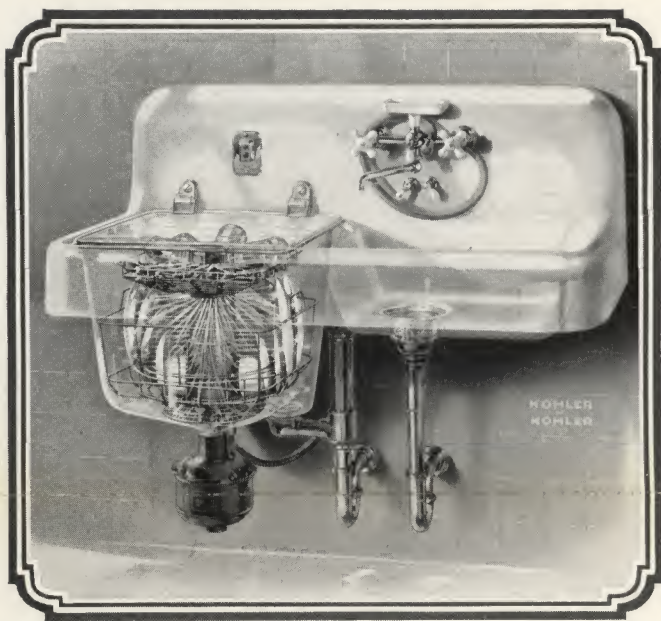

5 *The spray attachment makes rinsing quick and nearly effortless. Polish the glasses and silver and you are through.*

6 *The deep sink with waste control, the swinging faucet, the hose and spray, and the handy drainboard cover, make this an unequalled sink, irrespective of the dish-washer.*

Wouldn't YOU like to do YOUR dishes that way?

This transparent view shows how countless stinging jets from the spray tower wash clean every plate, cup, and saucer; every knife, fork, and spoon

THE MODERN SINK— ELECTRIFIED!

A DELIGHTFULLY easy, satisfactory way of washing dishes—*by electricity*—has arrived at last.

It is totally new and extraordinarily effective—this unique method perfected by Kohler engineers in their determination to give American women *the modern sink*.

In the KOHLER ELECTRIC SINK the dishes are washed by countless jets of hot water spurting from a central "spray tower." These stinging jets strike the dishes from every angle and are dashed back by the walls and cover of the compartment. They wash every bit of the surface of every dish—spotlessly, specklessly clean.

The dishes do not move. Nothing can happen to chip or crack them. And the whole operation is so simple, and the mechanism so safe, that even the most inexperienced operator can be trusted to do the right thing the very first time.

In addition to offering you the perfected electric dish-washer, the KOHLER ELECTRIC SINK presents a score of other advantages; such as the unusual depth of the sink proper, and the waste control for holding water; the swinging mixing faucet; the removable strainer cups for easy disposal of debris; the rinsing hose with its specially designed, slender nozzle; and the plated dish-washer cover—a perfect extra drain-board.

Most important is the fact that the KOHLER ELECTRIC SINK is a *permanent, built-in* fixture, free from the shortcomings common to "portable" appliances; also that the whole sink, dish-washing compartment and all, is made in one piece, without a joint or crack, and covered all over with the beautiful, sanitary white enamel for which Kohler Plumbing Fixtures have always been noted.

The Kohler Electric Sink will delight you—in every way.

YOU MUST SEE IT

Write for Complete Booklet

A MODEL FOR EVERY KITCHEN

The KOHLER ELECTRIC SINK is made in several sizes and arrangements—with or without an extra drainboard, with the dish-washer on the right or left side, or as a dish-washer alone.

THE largest KOHLER ELECTRIC SINK is 60½ inches long, 23½ inches from wall to front (with dish-washer at right, K-1100-R; with dish-washer at left, K-1100-L). Like all KOHLER ELECTRIC SINKS it is cast and enameled in one piece. This model is in effect a double-drainboard sink, having a regular drainboard at one end, balancing the drainboard cover at the other end. Features of special interest in this and other

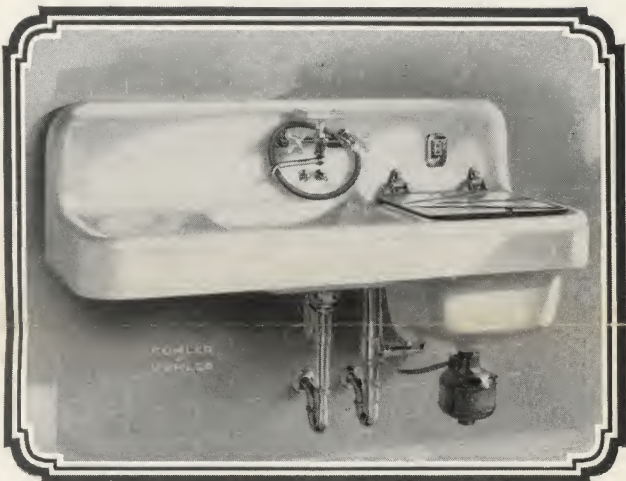

PLATE No. K-1100-R

models are the extra deep kitchen sink, the waste control on both sink and dish-washer, the removable cup strainers, and the combination swing-arm faucet with soap dish, hose, and spray. The KOHLER ELECTRIC SINK is furnished completely fitted, ready for installation, with the exception of traps.

PLATE No. K-1108-L

This model combines the dish-washer (on left) with an extra large kitchen sink. Length 48½ inches, wall to front 24¾ inches. An otherwise identical model, K-1108-R, has the dish-washer on the right. Two similar models, with right-hand or left-hand dish-washer, are 42½ inches long and 23½ inches from wall to front (K-1112-R and K-1112-L).

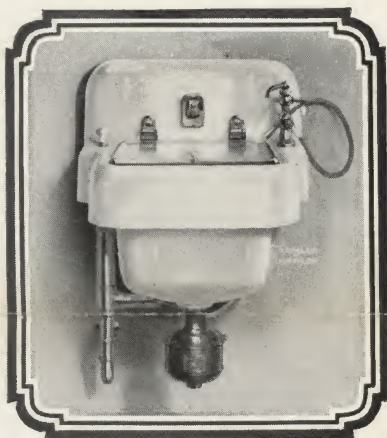

PLATE No. K-1118

For use where a separate dish-washer without the ordinary kitchen sink is desired, as in homes where the existing sink is to be retained or in restaurants, churches, schools and institutions.

See Your Plumber

THE Kohler Electric Sink, like all other Kohler Plumbing Fixtures, requires for its installation the capable professional services of the plumber. Your own plumber, very likely, sells Kohler Ware, and can tell you where you can inspect this new Kohler product.

He can also tell you about the Kohler of Kohler Time-payment Plan, which makes it possible to purchase and install the Kohler Electric Sink on a time payment basis. The terms of this plan are liberal and attractive and make it convenient for responsible people to secure immediate possession of a Kohler Electric Sink.
